Claim 1 recites, inter alia, *“an electrical assembly comprising: portions of the traces that are essentially parallel to each other and traverse a respective aperture in the voltage plane of the electrical assembly to induce compensating crosstalk signals having opposing polarity which opposes initial crosstalk signals”*; in the combination with other claimed features.

Claim 23 recites, inter alia, *“an electrical assembly comprising: electrical traces traverse apertures defined in one or more voltage planes of the assembly to inductively couple compensating crosstalk signals having opposing polarity to the original crosstalk signal”*; in the combination with other claimed features.

Claim 26 recites, inter alia, *“an electrical assembly comprising: an aperture in a voltage plane of the electrical assembly; essentially parallel portions of a corresponding pair of traces, the essentially parallel portions coplanar with the voltage plane and traversing the aperture therein to induce compensating crosstalk signals having opposing polarity to initial crosstalk signals”*; in the combination with other claimed features.

Claim 29 recites, inter alia, *“an electrical assembly comprising: essentially parallel portions of traces traverse apertures defined in one or more voltage planes of the assembly to inductively couple compensating crosstalk signals having opposing polarity to an original crosstalk signal”*; in the combination with other claimed features.
